PREFACE.

The matter of the following pages, the Second Edition, has been chiefly compiled by the undersigned at the suggestion of numerous individuals not a few of whom complain of the want of a convenient Text Book of reference in which Railway, the Public and Commercial demands are judiciously combined, hence it is with a wish to supply the desideratum complained of in some degree, that the present attempt has been made at great labour and cost.

- 2. In regard to the selections, great care has been taken that the matter be not only intimately interwoven, but also of such a nature as business transactions call most frequently into requisitions.
- 3. That the production might be rendered still more worthy of public patronage, The Tables of Pay and Wages and other useful Commercial Tables have been compiled, which add much to its intrinsic value, and it only remains to express the hope that the intelligent public will give that due appreciation to this work, as is warranted in proportion to its value.
